Cable grommets KT small are used with the following cable entry components:

- [KEL cable entry frames](#)
- [KVT split cable glands](#)

Black KT grommets have an increased chemical resistance, e.g. against aggressive oils, coolants etc.

KT multi-hole and special grommets enable a sealing of the cables with IP54.

When using double or quadruple grommets the cable density of cable entry frames and cable glands can be greatly increased. The multi-hole model range KT small is designed for cable diameters from 1 to 8 mm. icotek also offers special cable grommets for e.g. ASI lines. ATG adapter grommets provide the possibility to hold a small KT grommet to reduce the clamping range down to 1 mm.

When installing the small grommets in multiple rows, the flat sides should be facing each other. This allows the flat sides to match up and provide a secure seal.
